

Create The Permission Sets

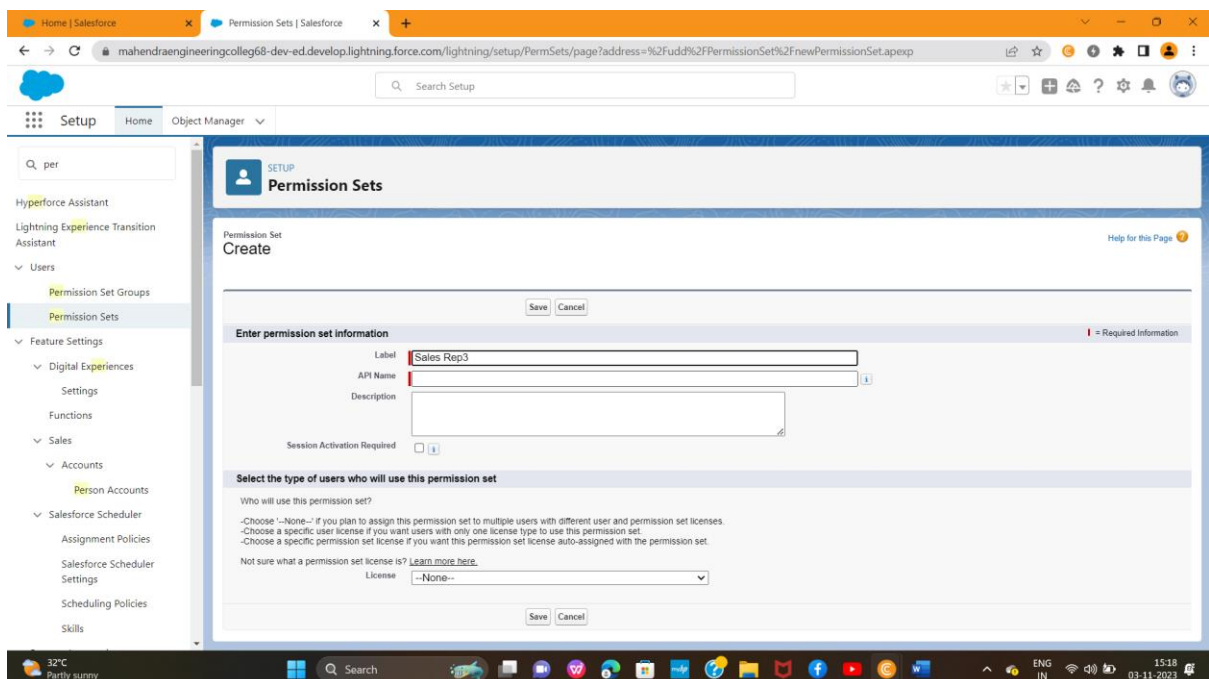

A permission set is a collection of settings and permissions that give users access to various tools and functions. Permission sets extend users' functional access without changing their profiles. Users can have only one profile but, depending on the Salesforce edition, they can have multiple permission sets.

Create the Permission Sets

1. Go to **setup** >> type “**permission sets**” in quick search >> select **permission sets** >> **New**

2. Enter the label name (Sales Rep3) >> save

3. Select Object settings

The screenshot shows the Salesforce Setup interface for a user named 'Sales Rep3'. The left sidebar contains navigation links for Setup, Home, and Object Manager. The main content area is titled 'Permission Sets' and shows the 'Object Settings' tab for the 'Sales Rep3' permission set. The table below lists the object settings for various Salesforce objects.

Object Name	Object API Name	Object Permissions	Total Fields	Tab Settings
Accounts	Account	No Access	40	--
AI Insight Reasons	AIInsightReason	No Access	--	--
AI Record Insights	AIRecordInsight	No Access	--	--
Alternative Payment Methods	AlternativePaymentMethod	No Access	27	--
API Anomaly Event Stores	ApiAnomalyEventStore	No Access	14	--
App Analytics Query Requests	AppAnalyticsQueryRequest	No Access	--	--
Application Usage Assignments	AppUsageAssignment	No Access	--	--
Appointment Categories	AppointmentCategory	No Access	3	--
Appointment Invitations	AppointmentInvitation	No Access	17	--
