

Create OWD Setting

1. Setup, use the Quick Find box to find Sharing Settings.
2. Click Edit in the Organization-Wide Defaults area.
3. For each object, select the default access you want to give everyone.
4. To disable automatic access using your hierarchies, deselect Grant Access Using Hierarchies for **Enquiry Property** custom object.

The image shows the Salesforce Setup page for 'Sharing Settings'. The left sidebar contains navigation links for Setup Home, Service Setup Assistant, Commerce Setup Center, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and various administrative and platform tool categories. The main content area is titled 'Sharing Settings' and includes a description of the settings, a 'Manage sharing settings for:' dropdown set to 'All Objects', and a 'Default Sharing Settings' table. The table has columns for Object, Default Internal Access, Default External Access, and Grant Access Using Hierarchies. It lists 50 objects with their respective default access levels.

These settings specify the level of access your users have to each others' data. Go to [Background Jobs](#) to monitor the progress of a change to an organization-wide default or a parallel sharing recalculation.

Manage sharing settings for: All Objects

[Disable External Sharing Model](#)
