

# Activity 4

Create a record type name as Rent with the above steps of activity 3

The screenshot shows the Salesforce Setup interface for creating a new record type for the 'Property' object. The page is titled 'New Record Type' and 'Property'. It is at 'Step 1 of 2: Enter the details'. The 'Existing Record Type' is set to '-Master--'. The 'Record Type Label' is 'Rent'. The 'Record Type Name' is empty. The 'Description' field is empty. The 'Active' checkbox is unchecked. Below the form, there is a table showing the 'Record Types Currently Available' for various profiles. The table has columns for 'Profile Name', 'Record Types Currently Available', 'Make Available', and 'Make Default'.

Profile Name	Record Types Currently Available	Make Available	Make Default
Analytics Cloud Integration User	Buy (Default)	<input type="checkbox"/>	<input type="checkbox"/>
Analytics Cloud Security User	Buy (Default)	<input type="checkbox"/>	<input type="checkbox"/>
Chatter External User	Buy (Default)	<input type="checkbox"/>	<input type="checkbox"/>
